SUMITOMO CHEMICAL

Sumithion®
20CS

Advanced Micro-encapsulation Technology

Water-based Concentrate

HACCP INTERNATIONAL FOOD SAFETY PROGRAMME CERTIFICATION

SUMITOMO CHEMICAL

Sumithion® 20CS

is an organophosphate insecticide contains active ingredient Fenitrothion 20% w/w.

The product utilises an advanced micro-encapsulation technology to create an even longer lasting residual control against crawling insect pests, including pyrethroid resistant cockroaches.

The technology allows the active ingredients to remain on surfaces instead of seeping away which minimal loss of active ingredient on the surface due to absorption when applied to porous surfaces as is happens with standard oil spray. However, it is not advisable to apply Sumithion® 20CS on white marble as it has been shown to discolour the surface.

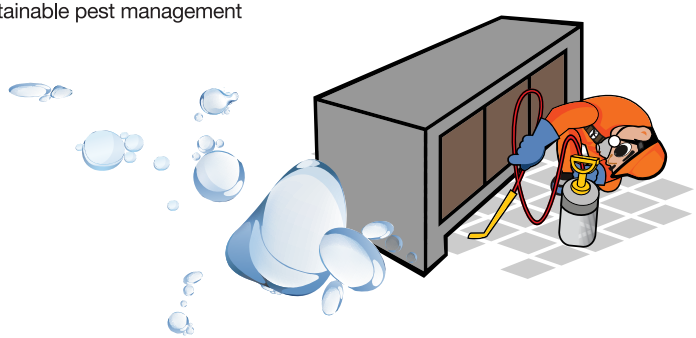

Biological efficacy

Sumithion® 20CS provides excellent control of target pests when used as directed.

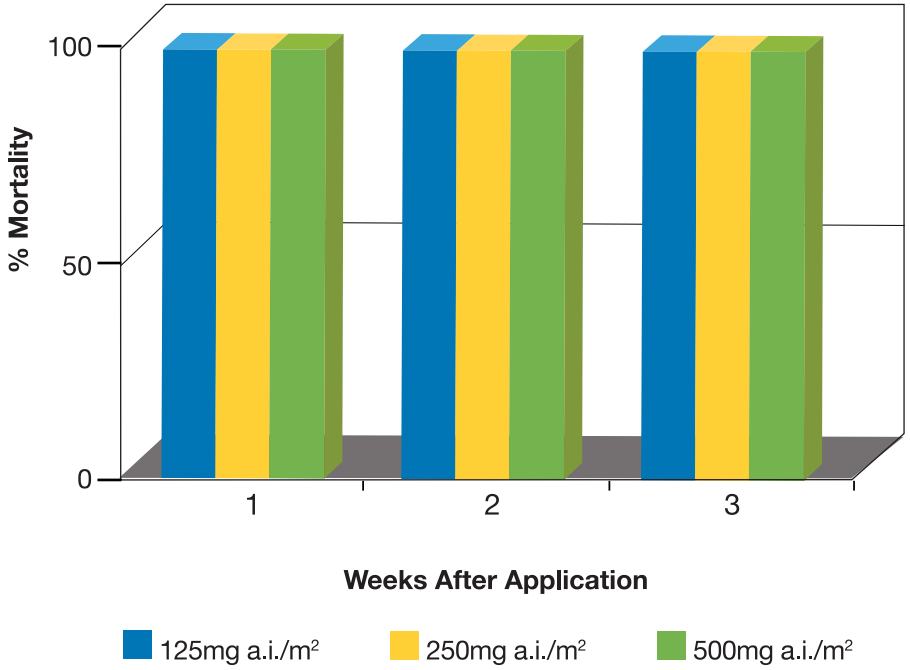

Why Choose Sumithion® 20CS

- Advanced micro-encapsulation technology
- Water-based concentrate
- HACCP certified. Suitable for use in food and non-food facilities as directed by label.
  Do not spray to areas where food, utensils, or processing surfaces may become contaminated
- Extended residual pest control effects against crawling pests including pyrethroid resistant cockroaches
- Excellent performance for sustainable pest management
- Extremely low toxicity
- Low odour
- Non-flammable

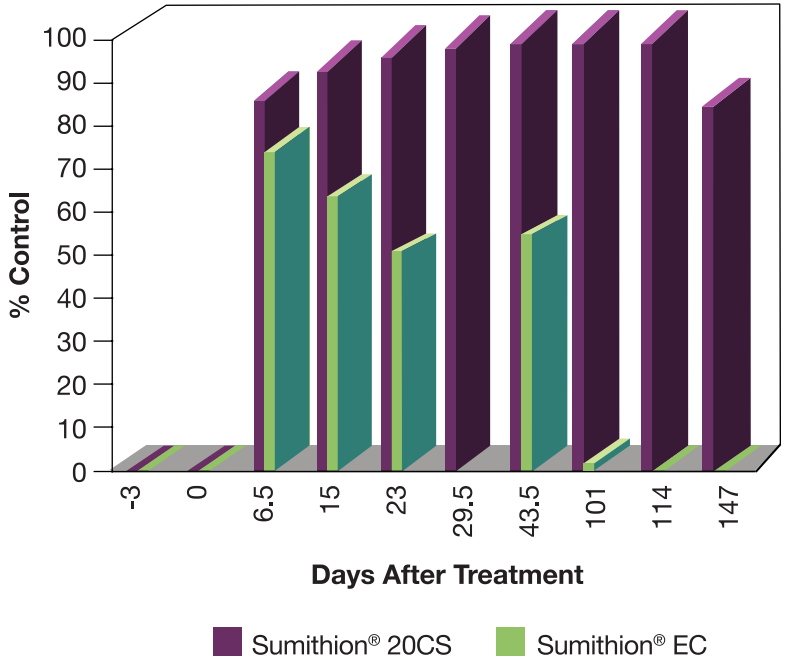

Packaging size: 1 Litre

Residual effect of Sumithion® 20CS against *Monomorium pharaonis*

Activity of Sumithion® 20CS against cockroaches *(Blatella germanica)* in a field trial comparison with Sumithion® EC

Regulatory and Technical Support
