

ENERGY POLICY

Energy Management System (EnMS) is developed for **SUMITOMO CHEMICAL ASIA PTE LTD, S-SBR Plant** to meet applicable ISO Energy Management System standards, to comply with legal and manufacturing industry requirements.

- Objectives and energy targets are set at the strategic/tactical and operational levels. Energy targets are expressed in terms of the identified Energy Performance Indicators (EnPIs). These objectives and energy targets in turn drive our energy strategies and processes.
- Continual improvement in energy performance and comply with applicable energy related legal and other requirements.
- Purchase of energy efficient products and design that improve energy performance and meet our EnMS requirements.
